Continuation of 5. does NOT place the application in condition for allowance because: In response to applicant's argument that the prior art does not recognize the connection between ion doping an impurity and the oxygen, nitrogen, and carbon concentrations, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See Ex parte Obiaya, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985). In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988)and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the motivation to have an oxygen, nitrogen, and carbon concentration less than 5 x 1018 atoms/cm3 establishes a prima facie case of obviousness with respect to a carbon, oxygen, or nitrogen concentration of less than 3 (or 1) x 1017 atoms/cm3 since overlapping ranges provide a prima facie case of obviousness (see MPEP 2144.05). A case of unexpected results has not been provided with respect to the smaller concentration range. Similarly, secondary evidence has not been provided to show the criticality of the diborane diluted with hydrogen.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See in re-McLaughiin, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).
